Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s Harvest of the Month program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Spinach

Grades: Kindergarten to 2nd Grade

Title of Lesson: Spinach

Materials: FFVP Spinach Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Many plants are grown for their leaves. Leafy plants are referred to as greens. They include spinach, kale, collards and mustard. Spinach is a small leafy green vegetable. It is soft with leaves that are oval to arrow-shaped. You can eat both the leaves and stems.

Spinach originally came from Persia (now Iran). Our name for spinach came from the Persian word “ispanai” which means “green hand” which later became “spanachia” (Latin) and today, spinach. People long ago named it ‘the prince of vegetables’. The green leafy vegetable made its way to China as a gift from the King of Nepal.

When spinach was introduced in Italy, it became the favorite vegetable of a famous Italian family. When the daughter, whose name was Catherine de Medici, left her home in Florence Italy to marry King Henry II of France, she brought along her own cooks who could prepare spinach in the many different ways that she liked. Since this time, dishes prepared on a bed of spinach are referred to as “à la Florentine”.

European settlers brought spinach as they settled in the New World.

The cartoon character Popeye was introduced in 1929. Popeye was very strong. He was strong because he ate spinach every day. For many years, spinach was the third most popular children’s food after turkey and ice cream. What is your favorite food?

Today, California is the leading producer of fresh and processed spinach in the United States. Processed spinach means the spinach is canned, frozen or puréed for baby food. Look for fresh, leafy, spinach in the produce section of the grocery store.

The number of people eating fresh spinach has increased. This is mostly due to the pre-cut, bagged spinach that is available today.

Spinach is in the green color food group. Eating 2 cups of raw spinach in a salad, will give you all of the vitamin A you will need for the day. It also gives you more than 4 times the Vitamin K you need for the day.

Spinach is the richest plant source of folate. Folate plays an important role in making new body cells. Other foods you can eat that contain folate are avocados, milk, oranges and peanuts.

Would you like to taste spinach now?

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Spinach

Grades: 3rd to 5th Grade

Title of Lesson: Spinach

Materials: FFVP Spinach Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

**Many plants are grown for their leaves.** Leafy plants are referred to as greens. They include spinach, kale, collards and mustard. Spinach is a small leafy green vegetable. It is soft with leaves that are oval to arrow-shaped. You can eat both the leaves and stems.

**Spinach originally came from Persia (now Iran).** Our name for spinach came from the Persian word “ispanai” which means “green hand” which later became “spanachia” (Latin) and today, spinach. People long ago named it ‘the prince of vegetables’. The green leafy vegetable made its way to China as a gift from the King of Nepal.

**When spinach was introduced in Italy, it became the favorite vegetable of a famous Italian family.** When the daughter, whose name was Catherine de Medici, left her home in Florence Italy to marry King Henry II of France, she brought along her own cooks who could prepare spinach in the many different ways that she liked. Since this time, dishes prepared on a bed of spinach are referred to as “à la Florentine”.

**European settlers brought spinach as they settled in the New World.**

**The cartoon character Popeye was introduced in 1929.** Popeye was very strong. He was strong because he ate spinach every day. For many years, spinach was the third most popular children’s food after turkey and ice cream. What is your favorite food?

**Today, California is the leading producer of fresh and processed spinach in the United States.** Processed spinach means the spinach is canned, frozen, or pureéd for baby food. Look for fresh, leafy, spinach in the produce section of the grocery store.

**Spinach will not grow in hot weather.** It is a cool weather crop. Once harvested, it will perish very quickly. When taken from the field, rapid cooling is essential.

**The number of people eating fresh spinach has increased.** This is mostly due to the pre-cut, bagged spinach that is available today.

**Spinach is in the green color food group.** Eating 2 cups of raw spinach in a salad, will give you all of the vitamin A you will need for the day. It also gives you more than 4 times the Vitamin K you need for the day.

**Spinach is the richest plant source of folate.** Folate plays an important role in making new body cells. Other foods you can eat that contain folate are avocados, oranges, milk, and peanuts

**Would you like to taste spinach now?**

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
S is for spinach.
Spinach
Making the Right Food Choices

Directions:
Draw and color 3 nutritious foods and 3 less nutritious foods in the appropriate boxes below.

Nutritious Foods

Less Nutritious Foods

Have you ever heard your teacher tell you that it is important to eat a rainbow? That’s because fruits and vegetables come in a rainbow of colors. Each color keeps your body strong in a different way. Make sure you eat a rainbow of colorful fruits and vegetables every day—red, yellow/orange, white, green, and blue/purple!

**Red:** Help you have a strong heart and a good memory.

**Yellow/Orange:** Help you have good vision, a strong heart, and keep you from getting sick.

**Green:** Help you have strong bones and teeth and good vision.

---

**Today’s fresh fruit/vegetable is:**

_________________________________________________________________

**The color of this fruit/vegetable is:**

_________________________________________________________________

**Eating this color can help my body by:**

_________________________________________________________________

**Other fruits and vegetables that are the same color are:**

_________________________________________________________________

**I plan to eat _______________ cups of fruits and vegetables every day.**
Eating spinach is a great way to give your body the vitamins, minerals, and nutrients it needs to stay strong and healthy!

Draw a picture of spinach above

**Directions:** Write a descriptive paragraph about spinach. Remember to use descriptive words and adjectives.

Glossary of Nutrients

**CALCIUM**  This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE**  Carbohydrates are a main nutrient found in food. Carbohydrates are the body's major source of energy.

**FAT**  Fat helps a child's body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER**  Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON**  This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS**  Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN**  Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A**  This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C**  This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E**  This vitamin helps maintain healthy cells throughout your body.

**WATER**  Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.
