Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s Harvest of the Month program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Apples

Grades: Kindergarten to 2nd Grade

Title of Lesson: Apples

Materials:
- FFVP Apples Student Worksheet
- FFVP Taste Test Teaching Points Lesson Plan
- Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Eat Your Colors- Fruits and vegetables come in a rainbow of colors. Apples can be red, yellow or green. Eat colorful fruits and vegetables every day.

What’s in a Name? Apples are part of the rose family.

Reasons to Eat Apples- Apples have fiber. Fiber helps food move through our body. Apples have vitamin C. Vitamin C helps keep us from getting sick.

Just the Facts- Apples are best when you eat them with the peel. That is where most of the fiber is found. Almost half of all apples are enjoyed as applesauce, apple juice and jellies or jams.

A Slice of Apple History- Apples have been around since ancient times. New kinds of apples were grown through a process known as grafting. During the 1800s, European settlers brought apples with them to the Americas.

Growing Facts- Washington is #1 in growing apples in America, #2 is New York, #3 is Michigan, #4 Pennsylvania, and California is #5.

California grows many different kinds of apples. Examples of some California grown apples are: Red Delicious, Golden Delicious, Gala, Fuji, Granny Smith, McIntosh, Rome, Jonathon and Pink Lady. Have you tried any of these delicious apples? Taste and compare different kinds of apples.

Apples are picked all year long and you can find many different kinds of apples throughout the year.

The Legend of Johnny Appleseed- John Chapman was born on September 26, 1774 in Massachusetts. He became known as “Johnny Appleseed.” He spent almost 50 years planting apple trees in Illinois, Kentucky, Pennsylvania and Ohio. Johnny Appleseed was known for being kind and generous. He sold apple trees to the settlers on the plains for a few pennies each or for some clothing. Some people had no money to pay him so they promised to pay him later. John Chapman died in 1845, but even after 200 years, some of his trees still bear apples.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Eat Your Colors- Fruits and vegetables come in a rainbow of colors. Apples can be red, yellow or green. Red and yellow apples help maintain a healthy heart. Green apples help maintain vision health and strong bones and teeth. Red, yellow and green apples may lower the risk of some cancers. Eat colorful fruits & vegetables every day.

What’s in a Name? Apples are part of the rose family. Domestic or table apples are one of the most widely grown tree fruits. Wild apple trees can still be found in the mountains of Central Asia.

Reasons to Eat Apples- Apples have fiber. Fiber helps food move through our body. Apples have vitamin C. Vitamin C helps keep us from getting sick. Apples contain a source of potassium, which helps maintain a healthy heart. Apples also contain the minerals iron and calcium and vitamin A.

Just the Facts- About 2,500 known varieties of apples are grown in the United States & more than 7,500 varieties are grown worldwide. Apples are best when you eat them with the peel. That is where most of the fiber is found. Almost half of all apples are enjoyed as applesauce, apple juice and jellies or jams. Apples can be used to replace fat and butter in baked goods.

A Slice of Apple History- Apples have been around since ancient times. New kinds of apples were grown through a process known as grafting. During the 1800s, European settlers brought apples with them to the Americas.

Setting Healthy Goals

When we want to make a positive change in our lives, it helps to set goals. You can set goals to be more physically active or eat better (by eating more fruits and vegetables, drinking more non-fat milk, and choosing more whole grains).

Steps to Setting a Goal:

1. Define your goal.
2. Write down the small steps you will need to take to achieve this goal.
3. Set a deadline.

1. My healthy goal is to ______________________________________
   ____________________________.

2. To achieve this goal, I need to take the following steps:
   A. _____________________________________________
   B. _____________________________________________
   C. _____________________________________________

3. The deadline for me to achieve my goal is _________
   ____________________________.

Glossary of Nutrients

**CALCIUM** This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE** Carbohydrates are a main nutrient found in food. Carbohydrates are the body’s major source of energy.

**FAT** Fat helps a child’s body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER** Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON** This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS** Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN** Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A** This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C** This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E** This vitamin helps maintain healthy cells throughout your body.

**WATER** Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Title of Lesson: Kiwis
Materials: FFVP Kiwis Student Worksheet
           FFVP Taste Test Teaching Points Lesson Plan
           Produce samples prepared by school food service staff
Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Kiwi are green with fuzzy brown skin. The skin can be eaten although many people choose not to eat it.

Green fruits and vegetables help your eyes stay healthy and help your teeth and bones stay strong. Why would you want strong bones and teeth?

Can you name some other green fruit and vegetables? green apples, green pears, avocados, okra, peas, broccoli, asparagus and spinach

Kiwi grow on a vine. The vine can grow as tall as 30 feet. The vines grow above the ground on strong supports very much like grapes. Have you seen grapes growing in a field? Have you seen kiwi’s growing?

Kiwi is a berry. Name another berry.

Kiwi are a very good source of vitamin C. Can you remember how vitamin C helps your body? Helps keep your bones together, helps heal cuts, helps teeth and gums stay healthy

California grows most (95%) of the kiwi grown in the United States. Kiwi were not widely available in grocery stores until 1970. Kiwi were named after the national bird in New Zealand, the kiwi bird.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Kiwis are a very good source of vitamin C. Can you remember how vitamin C helps your body? Helps keep your bones together, helps heal cuts, helps teeth and gums stay healthy

California grows most (95%) of the kiwi grown in the United States.
In North America, the fruit is commonly known as “kiwi”, but it is marketed to the rest of the world as ”kiwifruit”.

There are 400 varieties of kiwis. Hayward is the most popular variety in the United States.

Kiwis were not widely available in grocery stores until 1970.
Kiwis were named after the national bird in New Zealand, the kiwi bird.
Kiwis are the richest source of lutein among fruits and vegetables. Lutein is a phytochemical proven to be effective in reducing the risk of cancer.

Action Verbs

An action verb tells what someone or something is doing. Words that name an action are called action verbs.

Directions: Underline the action verb in each sentence below.

Example: Students picked strawberries for a nutritious snack.

1. My teacher cut kiwis for our class to taste.

2. Chopping up vegetables is fun!

3. I mixed the salad with a big spoon.

4. People should wash fruits and vegetables before they eat them.

5. Eating a nutritious breakfast is a great way to start the day.

Directions: Make a list of action verbs in the box below. Then, write a sentence using one of your action verbs to describe one healthy action you will do this week.

My action verbs

Examples: Mix Blended Cutting

My healthy action sentence

**IRON**  This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS**  Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN**  Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A**  This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C**  This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E**  This vitamin helps maintain healthy cells throughout your body.

**WATER**  Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Fresh Fruit & Vegetable Program

Orange Worksheets
Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s Harvest of the Month program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Oranges

Grades: Kindergarten to 2nd Grade
Title of Lesson: Oranges
Materials:
- FFVP Oranges Student Worksheet
- FFVP Taste Test Teaching Points Lesson Plan
- Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

**Oranges are round and grow on a tree.** They grow best in warm climates.
**Fruits and vegetables come in a rainbow of colors.** Oranges, like sweet potatoes, are in the yellow/orange color group.
**Oranges are a type of berry.**
**Orange trees produce leaves, flowers and fruit at the same time.** This makes them smell very good when they are in bloom. Have you ever smelled orange blossoms?
**Oranges are a good source of vitamin C and fiber.** Fiber is important in moving food you eat through your body.
**Oranges need to be protected from cold frost** in the winter. The fruit does not taste good when it freezes. Farmers use fans placed above the orange trees to mix the warmer air above with colder air near the ground. By warming the air the trees stay nice and warm and the fruit does not get ruined.
**Orange farmers must harvest their oranges when they are ripe.** Oranges are one of the few fruit that can be left on the tree without becoming overripe, but once picked, oranges will not continue to ripen.
**The two main varieties of oranges grown in California are Valencia and Navel.**
**Navels got their name** because the bottom looks like a bellybutton or navel. The bigger the navel, the sweeter the orange. Navel oranges are the most popular “eating orange” in the world.
**Valencia oranges are actually green.** As they ripen on the tree, they go from green to yellow-orange. When the weather turns warm, the oranges turn a little green again at the stem. This is called re-greening.
One of the original Naval orange trees brought to California in 1873, is still alive and producing fruit.
**Now, do you want to taste an naval orange?**

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
Taste Test Teaching Points
Oranges

Grades: 3rd to 5th Grade

Title of Lesson: Oranges

Materials:
- FFVP Oranges Student Worksheet
- FFVP Taste Test Teaching Points Lesson Plan
- Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

**Examples/suggested teaching points (as time permits)**

**Fruits and vegetables come in a rainbow of colors.** Oranges are in the yellow/orange color group.

**Oranges are a very good source of vitamin C and fiber.** Fiber is the part of the plant we cannot digest. Fiber helps move the food you eat through your body.

**Scurvy causes someone with a severe deficiency of vitamin C to bleed easily, especially around the gums.** Today we see scurvy only in severely malnourished people.

**Oranges are a type of berry.** Orange trees produce leaves, flowers and fruit at the same time. This makes them smell very good when they are in bloom. Have you ever smelled orange blossoms?

**Oranges need to be protected from cold frost in the winter.** The fruit can not be sold when it freezes. The farmers use fans placed above the orange trees to mix the warmer air above with colder air near the ground. By warming the air the trees stay nice and warm and the fruit does not get ruined.

**Orange farmers must harvest their oranges when they are ripe.** Oranges are one of the few fruit that can be left on the tree without becoming overripe, but once picked, oranges will not continue to ripen.

**The two main varieties of oranges grown in California are Valencia and Navel.**

**Navels got their name because the bottom looks like a bellybutton or navel.** The bigger the navel, the sweeter the orange. Navel oranges are the most popular “eating orange” in the world.

**Valencia oranges are actually green.** As they ripen on the tree, they go from green to yellow-orange. When the weather turns warm, the oranges turn a little green again around the stem. This is called re-greening.

**Oranges are first mentioned in history around 2201 B.C.** In 1493, oranges arrived in the new world with Christopher Columbus. Oranges were introduced to California from Mexico in 1769 with the founding of the first Spanish mission in San Diego. The first three Navel orange trees were brought from Brazil and planted in Riverside California in 1873. The quality was so much better than any other orange grown in California, it quickly became the most popular variety. Today, one of the original trees is still alive and producing fruit.

**Now, do you want to taste a navel orange?**

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
O/is/for/orange.
1. How many oranges did you draw? __________
2. What color are oranges? ________________
3. Are oranges a nutritious snack? Yes or No
Oranges

Draw a picture of yourself eating an orange

What I already know about oranges:
________________________________________________________________________
________________________________________________________________________

What I learned about oranges:
________________________________________________________________________
________________________________________________________________________

Circle the nutritious snacks.
Write the names of the nutritious snacks:
1. ___________________________________  3. _________________________________
2. ___________________________________  4. _________________________________
Happy New You!

What will you do this year to stay healthy?

My Healthy Eating Goal:
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

My Physical Activity Goal:
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

Draw a picture of yourself eating your favorite healthy food.

Draw a picture of yourself doing your favorite physical activity.
Drinking orange juice is a popular way people consume citrus fruit. But, oranges aren’t the only members of the citrus fruit family. Lemons, tangerines, grapefruit, and limes also belong to the Citrus family. Citrus fruits are usually orange, yellow, or green in color. They are very high in vitamin C, which make them important for healthy teeth and gums, skin, and fighting off infections.

What type of citrus fruit do you usually eat or drink? _________________________
What type of citrus fruit would you like to try? _______________________________

Eating fruit as part of a nutritious breakfast is one way to make sure you get the amount of fruit recommended.

What can you do to make your breakfast more nutritious? Create a nutritious breakfast menu and draw a picture of it!
Setting Healthy Goals

It helps to set goals when we want to make a positive change in our lives. You can set goals to help you be more physically active or eat better (eating more fruits and vegetables, drinking more skim milk, and eating more whole grains).

Steps to Setting a Goal
1. Define your goal
2. Write down the small steps you need to take to achieve the goal.
3. Set a deadline.

1. My healthy goal is to _________________________________.

2. To achieve this goal, I need to take the following steps:
   A. ________________________________
   B. ________________________________
   C. ________________________________

3. The deadline for me to achieve my goal is:__________________
   ________________________________

This material was adapted from the California Harvest of the Month program materials. This material was funded by the USDA’s Supplemental Nutrition Assistance Program (SNAP), an equal opportunity provider and employer. The SNAP program provides nutrition assistance to people with low income. It can help you buy nutritious food for a better diet. For information on the SNAP program, call 1-888-328-0483.
Orange Poetry

Directions: Create a poem about oranges to share with your class using descriptive words.

Example: Apples
Apples are red, round and sweet
So delicious to eat
They are firm, solid and bright
Just an absolute delight!

Brainstorm
List some descriptive words that can be used in your poem.

Nutritious

Directions: With your teacher, cut your orange into the following fractions.

When I cut my orange in 1/2, this is what it looks like:

When I cut my orange into 1/4, this is what it looks like:

When I cut my orange into 3/4, this is what it looks like:

When I cut my orange into 4/8, which is equivalent to 1/2, this is what it looks like:

Write some equivalent fractions, decimals, or percents below.

example: 1/4 = 2/8 or .25  
2/4 = _____or_____  
3/4 _____or _____

Next week, I plan to eat ______________ oranges!
Directions: With your teacher, cut your orange into the following fractions.

When I cut my orange in 1/2, this is what it looks like:

When I cut my orange into 1/4, this is what it looks like:

When I cut my orange into 3/4, this is what it looks like:

When I cut my orange into 4/8, which is equivalent to 1/2, this is what it looks like:

Write some equivalent fractions, decimals, or percents below.

example: $\frac{1}{4} = \frac{2}{8} \text{ or } 0.25 \quad \frac{2}{4} = \text{_____ or _____} \quad \frac{3}{4} \text{ _____ or _____}$

Next week, I plan to eat ______________ oranges!
Have you ever heard your teacher tell you that it is important to eat a rainbow? That’s because fruits and vegetables come in a rainbow of colors. Each color keeps your body strong in a different way. Make sure you eat a rainbow of colorful fruits and vegetables every day – red, yellow/orange, white, green, and blue/purple!

Red: Help you have a strong heart and a good memory.

Yellow/Orange: Help you have good vision, a strong heart, and keep you from getting sick.

Green: Help you have strong bones and teeth and good vision.

Today’s fruit or vegetable is:
_________________________________________________.

The color of this fruit or vegetable is:
___________________________________________________.

Eating this color can help my body by:
___________________________________________________.

Other fruits and vegetables that are the same color are:
___________________________________________________.

I plan to eat _____ cups of fruits and vegetables every day.
Oranges are an excellent source of Vitamin C. Vitamin C helps our bodies fight off illnesses.

1. How much vitamin C is found in 1 medium orange? ________%.

2. Kiwifruits also are an excellent source of vitamin C. As a matter of fact, one serving of two kiwi fruits contains 240% Which fruit has more vitamin C per serving? ________________.

3. I will try to eat more fruits and vegetables that are high in vitamin C like oranges, kiwis, bell peppers, strawberries, broccoli, and cantaloupe because these fruits will ________________.

Nutrition Questions

Describe oranges: __________________________________________
__________________________________________________________.

YES! However, determining whether produce is a fruit or vegetable can be a little tricky at times. Let’s learn about the difference between fruits and vegetables by reading the information below.

**What is a FRUIT?**
Basically, almost everything that contains seed(s) inside is botanically a fruit! Fruit is the sweet, ripened ovary or ovaries of a seed-bearing/flowering plant. The function of the fruit is to protect the seeds and play a part in their distribution. Animals eat the fruit and then later “distribute” the seeds with accompanying “fertilizer.”

**What is a VEGETABLE?**
Vegetables are the edible product of herbaceous plants and are grouped according to the edible part of each plant: **leaves** (lettuce), **stem** (celery), **roots** (carrot), **tubers** (potato), **bulbs** (onion), and **flowers** (broccoli).

Remember plant germination and reproduction are related to the structure and function of seeds, flowers, and fruits. Some items we call vegetables are actually a fruit such as a tomato.

**Directions:** Determine which produce below is a fruit or vegetable and write your answer on the lines below.

<table>
<thead>

Glossary of Nutrients

**CALCIUM** This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE** Carbohydrates are a main nutrient found in food. Carbohydrates are the body’s major source of energy.

**FAT** Fat helps a child’s body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER** Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON** This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS** Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN** Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A** This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C** This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E** This vitamin helps maintain healthy cells throughout your body.

**WATER** Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Taste Test Teaching Points

Pears

Grades: Kindergarten to 2nd Grade

Title of Lesson: Pears

Materials: FFVP Pears Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

People have been growing pear trees for a very, very long time. They date back to ancient times.

Pears can be red, yellow, brown or green. You can figure out what color group a fruit belongs to by looking at the peel if you plan to eat the peel. If you don’t eat it then it will belong to the same color group as the part you eat.

Pears have seeds: they are fruits.

Pears grow on beautiful trees with green leaves.

Most tree fruit tastes best when it ripens on the tree but pears taste best when they ripen off the tree.

Red fruits and vegetables help your heart stay healthy. They also help you remember things like where you put your shoes or the answer to the math question.

Pears are a good source of vitamin C. They are not a good source of protein.

Vitamin C helps your body fight off germs that make you sick. Vitamin C also helps keep your bones together.

The Bartlett pear is the favorite pear in America. California is #1 for growing Bartlett pears.

Pears are best for you when eaten with the peel.

There are 3000 different varieties of pears in the world.

Pears like the warm days and cool nights found in Oregon, California and Washington.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
Taste Test Teaching Points
Pears

Grades: 3rd to 5th Grade

Title of Lesson: Pears

Materials: FFVP Pears Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

People have been growing pear trees since ancient times. The Romans developed more than 50 varieties of pears.

Early Americans brought pear seedlings across the Atlantic to the Massachusetts Bay Colony.

The Bartlett Pear is the favorite pear in America. The Bartlett pear was developed in England by a man named John Stair in the 17th century.

California is #1 for growing Bartlett pears and #2 in pear production, growing 32% of all pears grown in the United States.

Pears can be red, yellow, brown or green. You can figure out what color group a fruit belongs to by looking at the peel if you plan to eat the peel. If you don't eat it then it will belong to the same color group as the part you eat.

Pears have seeds: they are fruits.

Pears are an excellent source of fiber. Fiber is the part of the plant your body cannot digest.

Most tree fruit tastes best when it ripens on the tree but pears taste best when they ripen off the tree.

Red fruits and vegetables help your heart stay healthy. They also help you remember things like where you put your shoes or the answer to the math question.

Pears are a good source of vitamin C.

Vitamin C helps your body fight off germs that make you sick. Vitamin C is important in making collagen. Collagen keeps your bones together.

Pears are best for you when eaten with the peel. This is where most of the fiber and antioxidants are found.

There are 3000 different varieties of pears in the world.

Pears like the warm days and cool nights found in Oregon, California and Washington.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff.
   Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Healthy and Fun Parties

This year, your teacher would like to have nutritious foods at your classroom parties. Nutritious foods can be colorful, delicious, and fun! Can you think of some foods that would taste good and be nutritious?

Directions: List three delicious and nutritious foods and drinks that you might want to include in a classroom party this year and why.

Example: Carrots
Why? Because they are good for my eyes.

Three delicious & nutritious foods and drinks that I would like to include in a classroom party are:

1. ____________________________
   Why? ____________________________

2. ____________________________
   Why? ____________________________

3. ____________________________
   Why? ____________________________

Eat a Rainbow!

Have you ever heard your teacher tell you that it is important to eat a rainbow? That’s because fruits and vegetables come in a rainbow of colors. Each color keeps your body strong in a different way. Make sure you eat a rainbow of colorful fruits and vegetables every day—red, yellow/orange, white, green, and blue/purple!

Red: Help you have a strong heart and a good memory.

Yellow/Orange: Help you have good vision, a strong heart, and keep you from getting sick.

Green: Help you have strong bones and teeth and good vision.

Today’s fresh fruit or vegetable is: ____________________________________________.

The color of this fruit or vegetable is: ____________________________________________.

Eating this color can help my body by: ____________________________________________.

Other fruits and vegetables that are the same color are: ________________________________.

I plan to eat _____ cups of fruits and vegetables every day.

Healthy and Fun Parties

This year, your teacher would like to have nutritious foods at your classroom parties. Let’s make these parties colorful, delicious, and fun! Can you think of some foods that would taste delicious and be nutritious?

Directions: List in ABC order, seven delicious and nutritious foods and drinks that you would like to include in a classroom party this year.

Example: Yogurt parfaits (fruit, nonfat vanilla yogurt, & granola)

Glossary of Nutrients

**CALCIUM** This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE** Carbohydrates are a main nutrient found in food. Carbohydrates are the body’s major source of energy.

**FAT** Fat helps a child’s body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER** Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON** This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS** Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN** Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A** This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C** This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E** This vitamin helps maintain healthy cells throughout your body.

**WATER** Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Fresh Fruit & Vegetable Program

Strawberries Worksheets
Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s Harvest of the Month program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Strawberries

Grades: Kindergarten to 2nd Grade

Title of Lesson: Strawberries

Materials: POM Strawberry Student Worksheet
POM Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review POM FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Strawberries are in the red color group. What is your favorite red fruit or vegetable? Fruits and vegetables come in a rainbow of colors. Eating red fruits and vegetables can help your heart stay healthy and help you remember things, like where you put your backpack.

We are not sure how strawberries got their name. Some believe that the name came from the practice of placing straw around the growing plants for protection, or from children who threaded the berries with straw and offered them for sale. Others believe the name came from the little “runners” (or branches) that grow out from the plant.

Strawberries are a member of the rose family. Have you seen a rose?

Strawberry plants need plenty of water. The growing plant likes warm days and cool nights. Do you think strawberry plants would like to grow where you live?

Strawberries are very delicate and must be picked by hand when ripe and carefully placed in plastic baskets or containers. They can get a bruise very easily. Picking strawberries is very hard work.

Strawberries are the first fruit to ripen in the spring.

Where are the seeds found in most fruits? The seeds of the strawberry are found on the outside. How many seeds do you think are on the outside of the strawberry? There are about 200.

Strawberries are the most popular berry in the United States.
California is the largest producer of strawberries in the United States. Strawberries can be grown almost all year long in California. If all the strawberries produced in California this year were laid berry to berry, they would wrap around the world 15 times. WOW! Aren’t we lucky that Nevada is so close to California?

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
Taste Test Teaching Points

Title of Lesson: Strawberries

Materials: POM Strawberry Student Worksheet
POM Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review POM FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Fruits and vegetables come in a rainbow of colors. Strawberries are in the red color group. Red fruits and vegetables help you have a healthy heart and memory. They may also lower the risk of some cancers. Can you name any other red fruits and vegetables?

One cup (about eight large berries) of strawberries gives your body a lot of Vitamin C. Vitamin C helps you fight sickness, helps keep your blood strong, helps hold your bones together and helps keep your teeth and gums healthy.

Strawberries are the most popular berry in the United States.

Do you know what state grows the most strawberries? California is the largest producer of strawberries in the United States. Do you know where California is?

If the strawberries grown in California this year were laid berry to berry, they would wrap around the world 15 times.

We are not sure how strawberries got their name. Some believe the name came from the practice of placing straw around the growing plants for protection, or from children who threaded the berries with straw and offered them for sale. Others believe the name came from the little “runners” (or branches) that grow out from the plant.

To produce the best crop the strawberry plants need plenty of water, warm days and cool nights.

Because strawberries are delicate, they are picked by hand when ripe and carefully placed in plastic baskets or containers. Once the berries leave the field, they are taken to cooling facilities to help them last longer.

Strawberries are the first fruit to ripen in the spring.

Where are the seeds found in most fruits? The seeds of a strawberry are found on the outside. How many seeds do you think are on the outside of the strawberry? On average, there are 200 tiny seeds on every strawberry.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
